

# GORILLA POST

Magnetic Mounting System

TAMING THE URBAN JUNGLE  
Your Delineator & Bollard Resource

## Driven by Gorilla Post System Technology

The Gorilla Post™ system offers a wide variety of products to solve a vast range of delineation and signpost challenges. Several of our products are suitable for use in roadways.

The revolutionary Gorilla Post Magnetic Base System is ADA-compliant, with over a decade of use by our global customers. A set of powerful magnets in the base, with almost 400 pounds of resistance, temporarily couples to a thin metal base plate adhered to either concrete or asphalt. Uncoupling the post or bollard is simple using a specially designed removal tool that is part of the system.
